

## **University of Central Missouri (UCM), Warrensburg - Bachelor of Science in Crisis and Disaster Management**

One of the oldest programs of its kind in the nation, the program offers option areas in Business Continuity, Emergency Management, Emergency Services Management, and Environmental Hazards. All requirements to complete the Crisis and Disaster Management degree are available both on campus in a face-to-face environment and 100% online.

The degree program facilitates individual professional development in a student-centered learning environment. Its multidisciplinary curriculum focuses on the principles of preparedness, response, mitigation, and recovery in an integrated program of study. The emphasis of the program is applied research, and students who seek this degree are required to complete a practicum which provides them with a structured field experience to complement their educational accomplishments.

The Crisis and Disaster Management degree program collaborates with the Institute for Rural Emergency Management (IREM). IREM is active in public service, training, and emergency responder safety. Students are encouraged to participate in IREM projects.
